**Health & Safety Policy**

## Policy for Health and Safety

The implementation of our management system is fundamental to running our business successfully. We recognise our responsibilities and duties under the Health and Safety At Work etc Act 1974 and associated regulations and it is our priority and intention to meet these requirements.

We aim to provide our employees with a safe and healthy working environment, which as far as is reasonably practicable, protects them from any harm. Our managers and staff are fully informed of their responsibilities to ensure that they take all reasonable precautions to ensure the safety, health and welfare of anyone likely to be affected by the operation of our business. To this end we will also reasonably assist our clients in meeting their own safety responsibilities.

We will achieve good Health and Safety performance by:

- Doing all that is reasonably practicable to prevent injury and work related ill health;
- Providing and maintaining equipment, plant and work systems which are safe and without risks to health;
- Regularly assessing the hazards and risks created in the course of our business;
- Consulting with our employees on matters affecting their health and safety, whilst they are at work;
- Providing information, instruction, training and supervision necessary to ensure the health and safety of our employees;
- Ensuring that all employees are competent to do their work;
- Making necessary arrangements to ensure the safety and protection from health risk in the use, handling, storage and transportation of equipment, products and other goods;
- Providing a working environment which is safe, without risk to health, with adequate facilities and arrangements for welfare at work;
- Implementing emergency procedures – evacuation in case of fire or other significant incident;
- Annually reviewing and revising, if necessary, this policy, and
- Providing adequate resources for its implementation.
